

ABOUT ME

Eager to expand my knowledge and advance professionally, I am committed to building a solid future in my sector. My experiences of studying and working in EEUU and Australia have enriched me with diverse insights, fueling my determination to succeed. I possess a strong disposition to learn and adapt swiftly to changing conditions. With an aspiration to deliver value and enhance technological development, I am poised to make significant contributions to the industry.

WORK EXPERIENCE

WINTO
Málaga
Jan 2025 - Present

CO-FOUNDER & CO-Lead Developer

- Founded an online ticketing startup with four partners. I am part of the technical team of two developers who designed and built the entire platform. Participated in the CIBEREMPRENDE incubation program
- Created a ticketing and event management SaaS: from UX/UI and wireframes, Node + MongoDB microservices architecture, front-end React + Tailwind, and Stripe payment gateway integration.
- winto.app (user platform), panel.winto.app (organizer panel)

DRIVE ME BARCELONA
Barcelona
Jan 2024 - Dec 2024

FULL STACK WEB DEVELOPER

- Developed a used car marketplace portal leveraging scraping from multiple external sites.
- Implemented full CRUD functionality for vehicle and user management.
- Designed advanced search filters (brand, model, price, etc.) to enhance user experience.
- Developed the entire front-end architecture, from API integration and data handling to custom CSS and responsive design.
- Developed data synchronization and automation of various processes with third-party applications like Netsuite and Zoho.

FREELANCE
Remote
Jan 2025 - Present

FREELANCE • Full-Stack Web Developer

- Fully designed and developed three corporate websites (sereneproyectos.com, parkingcentrotarifa.com, hacienadanadales.com), covering the entire cycle: client briefing, wireframes, visual design, development, basic SEO, and deployment.
- Implemented a lightweight CMS for clients to self-manage content.

UFIT 365
Jan 2022 - Aug 2022

FLUTTER DEVELOPER

- My main task was to migrate the entire front-end application to Flutter.
- Built an efficient architecture for state management and created a comprehensible code environment.
- Designed following UX/UI design patterns.
- Worked closely with an app developer with over 15 years of experience.
